PROFESSIONAL SUMMARY

B.Tech Information Technology graduate (2025) with hands-on full-stack development experience across React.js, Python (Flask), and MongoDB. Built and shipped a production-style AI customer support platform with a Retrieval-Augmented Generation (RAG) pipeline and JWT-secured REST APIs, plus a graph-database-backed scouting platform and an AI medical diagnostic system at 90%+ accuracy. Seeking a Full Stack Developer or Junior Web Developer role to build and ship reliable, well-tested web applications from day one.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks, Tailwind CSS, Responsive Design

Backend: Python (Flask), REST API Development, JWT Authentication, bcrypt, Node.js (Basics)

Database: MongoDB Atlas, MySQL, Neo4j (Graph DB)

Cloud & DevOps: Git, GitHub, Linux, CI/CD (Basics)

Tools & Practices: VS Code, Postman, OOP, Data Structures, Agile/Scrum, TypeScript (Basics)

PROJECTS

ShopNest - AI-Powered E-Commerce Customer Support Platform 2026

Tech: React.js, Python, Flask, MongoDB Atlas, Groq API (Llama 3.3 70B), JWT, REST API, Tailwind CSS

- Architected a production-style AI support platform with 15+ REST API endpoints using Flask Blueprints for a modular backend.
- Engineered a RAG pipeline retrieving FAQ context before calling Groq's Llama 3.3 70B, producing business-specific responses instead of generic AI answers.
- Implemented JWT authentication with bcrypt hashing and role-based access control (Admin/User) across all protected routes.
- Built a real-time admin dashboard for user monitoring, conversation analytics, and FAQ knowledge base management.

Scout - Football Scouting Graph Database Platform 2026

Tech: React 18, Vite, Tailwind CSS, Flask, Neo4j, d3-force

- Built a full-stack scouting platform using Neo4j to model player-club-league relationships as a graph, enabling relationship-based queries beyond standard SQL joins.
- Designed interactive d3-force network visualizations to explore scouting connections and player data.
- Delivered as a client assignment covering the full stack: Flask API, graph database design, and deployed React frontend.

EyeSight - AI-Based Diabetic Retinopathy Detection System 2025

Tech: Python, TensorFlow, React.js, Flask, REST API

- Built a full-stack diagnostic web app for early Diabetic Retinopathy detection from pupillometry images, targeting low-cost screening for underserved healthcare settings.
- Implemented and benchmarked three deep learning architectures (EfficientNet, ResNet, DenseNet) in TensorFlow, achieving 90%+ classification accuracy.
- Built risk-visualization dashboards showing model confidence scores alongside automated report generation.

EDUCATION

Bachelor of Technology - Information Technology Aug 2021 - Jul 2025

Mohamed Sathak AJ College of Engineering, Chennai

CERTIFICATIONS

Complete Python Bootcamp - Udemy | Java Full Stack Training - TNS India Foundation | Advanced MS Office - Naan Mudhalvan (Tamil Nadu Government)
